

Images of beauty for everyone with Quick AF Live View freestyle shooting

These babies have IB photography taken in such a variety of ways. With the glowing eyes and hair of a newborn, or the soft smile of a child, and the lighter and softer atmosphere of a woman's body, or the IB of a dog, these photos are truly beautiful. They want to enjoy the power and performance of digital IB photography. And don't worry if you're never used to IB photos. Assistance is built right into the camera, with a clear message that guides you through the steps. You capture the images of beauty you've always wanted.
